DUSTPROOFER & HARDENER

For Sealing Concrete

Description

A premium grade, low viscosity dust-proofer and hardener specially formulated to chemically seal concrete and harden its surface.

Uses

For sealing and hardening concrete floors, both new and old, in garages, warehouses, factories and workshops. Bond It **DUSTPROOFER & HARDENER** penetrates into the concrete to produce a non-dusting hard wearing surface with improved resistance to oils, greases and water.

Application

Gloves, boots and goggles should be worn at all times during application. Ensure all surfaces are clean, dry and free from oil, grease, paint or polish to maximise the effectiveness of this product. If in doubt use Bond It **BRICK & PATIO CLEANER** to remove any stubborn stains before washing down and applying Bond It **DUSTPROOFER & HARDENER**. Apply uniformly using a brush at the rate of 3-5m² per litre ensuring puddling does not occur and using a firm action to work the product well into the floor. Allow the first coat to cure overnight before applying a second coat, which is normally sufficient for most floor types. Further coats can be applied, allowing the previous coat to cure before application, remembering to leave at least 24 hours before washing down.

Limitations

Do not use on masonry or coloured concretes. Very dense power floated floors may not allow effective penetration. Do not wash the floor for at least 24 hours after the final coat is applied. **DUSTPROOFER & HARDENER** will not reinstate disintegrating concrete.

Storage Conditions

Store in cool, dry conditions in a sealed container between 5 & 30°C and protect from freezing.

Shelf Life

Up to 24 months when stored according to manufacturers instructions.

Coverage

3-5m² per litre, depending on porosity.

Disposal of Containers

Do not leave empty containers where residue could be harmful to children, animals or the environment. Replace lids and remove any containers to a central disposal point in accordance with local regulations.

Health & Safety

- ◆ Alkaline product.
- ◆ Flammability - non-flammable.
- ◆ Avoid eye contact, wear eye and face protection. In the event of contact irrigate eyes immediately with plenty of cold, clean water for 15 minutes and seek medical attention. Could cause irritation.
- ◆ Avoid prolonged contact with skin. Wear wellington boots, protective clothing and gloves. Could cause irritation.
- ◆ Do not ingest. In the event of ingestion, do not induce vomiting, drink plenty of water and seek medical attention.
- ◆ Thoroughly wash hands with soap and water after use.
- ◆ Keep out of reach of children.
- ◆ Some people are more sensitive to chemical products than others. If irritation occurs discontinue use.
- ◆ See separate material safety data sheet for full handling, use and storage.

Specification Summary

Flammability	Non Flammable
Boiling Point	100°C
Solubility in water	Soluble
pH	Approximately 11-13
Appearance	Colourless liquid

Container Sizes

Code:	BDH090	BDH091	BDH092
Size:	5L	25L	200L

The data presented in this leaflet are in accordance with the present state of our knowledge, but do not absolve the user from carefully checking all supplies immediately on receipt. We reserve the right to alter product constants within the scope of technical progress or new developments. The recommendations made in this leaflet should be checked by preliminary trials because of conditions during processing over which we have no control, especially where other companies raw materials are also being used. The recommendations do not absolve the user from the obligation of investigating the possibility of infringement of third parties rights and, if necessary clarifying the position. Recommendations for use do not constitute a warranty, either expressed or implied, of the fitness or suitability of the products for a particular purpose.
